NOTE: Table cells showing 0.0 refer to estimates that are suppressed (cannot be published) because they are below the confidentiality threshold. The LFS estimates are based on a sample and are therefore subject to sampling variability. As a result, monthly estimates will show more variability than trends observed in areas or industries also have more variability. For an explanation of sampling variability of estimates and how to use standard errors to assess this variability, consult the 'Estimates quality' section of the publication Labour Force Information (Catalogue number 71-001-X).

The confidentiality threshold is less than 500 for Newfoundland and Labrador, New Brunswick, Nova Scotia and less than 200 for Prince Edward Island.
