Notes:

Figures may not add to total due to rounding. For more information see our Frequently Asked Questions.

In 2011, data is suppressed for cells that round to less than 20 individuals or households. In all other years, the rounded suppression cutoff is 10 individuals or households.

There is a slightly revised methodology for the Newfoundland and Labrador Market Basket Measure as of 2012. For communities on the island of Newfoundland requiring ferry services, the number of ferry trips allotted to the nearest service centre has increased. For Labrador communities requiring ferry services, vehicle cost has been removed, and the ferry cost includes the entire family.
