.. not available for a specific reference period

Notes:

Level : (ID) final intercensal estimates; (PD) final postcensal estimates; (PR) updated postcensal estimates; (PP) preliminary postcensal estimates.

Footnotes:

¹ The estimates of the number of households are derived from tax data from the T1 Family File (T1FF), census data, census net undercoverage data from coverage studies and population estimates. For postcensal estimates, data from the census and the coverage studies are derived using 2021 data, while 2006, 2011, 2016 and 2021 data are used for the intercensal estimates.

² A private household refers to a person or group of persons who occupy the same private dwelling and do not have a usual place of residence elsewhere in Canada or abroad. The household may consist of a family group such as a census family, of two or more families sharing a dwelling, of a group of unrelated persons or of a person living alone.

³ The estimates on the number of private households of a size of 3 persons, 4 persons, 5 persons and 6 or more persons are available starting in 2016.
